

EASY CONSTRUCTION BAT BOX PLANS

Aidan Winters

ONE PIECE **1800 x 225 X 25**
BAT BOX **(1800 x 200 X 20)**
 (1800 x 150 min X 20)

- Notes:**
1. Roughen internal surfaces .. Better still cut grooves every 10mm (grip for bats to hang)
 2. Use water based (no solvent based) glue / paints (bats won't come with smell)
 3. Use external waterproof glue or sealant (non solvent) on joints. (to keep bat's house dry)
 4. Paint/preserve: Dark colour water based with matt/rough finish best (no solvent based)
 5. Dark matt finish paint / preservatives absorb heat (nice & warm home attracts bats)
 6. Place 4m height (80 -> 100mm screws or tie around tree 3 mm galvanised wire)

EASY CONSTRUCTION BAT BOX (variation on KENT PATTERN)
